Pro-Ject's Debut Carbon gewinnt!

TESTED

Sony 3D LCD HDTV • Sonus Faber Speakers
Rotel Preamp/Processor
Yamaha A/V Receiver • Logitech Harmony Touch Remote

BOTTOM LINE

With its stock Ortofon 2M Red cartridge, Pro-Ject's Debut Carbon gave me a clean, vibrant sound quality that reminded me quite a bit of the \$1,999 Rega RP6/Exact cartridge combo I recently reviewed. That the Debut Carbon can approach the RP6's performance at 20 percent of its price is remarkable, to say the least. Its sound isn't perfect — rock fans might want more oomph in the bass — but if I were buying a budget table tomorrow, this is the one. **SV**

JANUARY 2013
